Laby VCE Physics Teachers’ Grant

The Laby Foundation is offering grants with the aim of building capacity in physics teaching across Victoria, specifically targeting (but not solely limited to) disadvantaged and rural schools.

The grants are available to help fund teachers to attend the Physics VCE Focus Day on 9 November 2012.

We invite applications from interested schools/teachers. Funding up to $500 per applicant is available, depending on circumstances. Funds are to cover registration fee and/or CRT costs and/or travel expenses. The numbers of grants are limited and will be assessed in the order they are received.

Provide your case for sponsorship (a substantiated statement) based on the following selection priorities:

1. Geographical and/or socio-economic disadvantage
2. Access to high-quality professional learning in order to strengthen capacity in teaching physics
3. Low uptake of science subjects at VCE level, particularly physics, and/or low science profile in the school
4. Other disadvantage identified by applicant.

How to apply:

A letter advising of the outcome of the grant will be emailed to applicants. Successful applicants will be advised how to arrange reimbursement of their CRT and/or travel costs which will be paid after the event.

Conditions:

Your statement addressing one or more of the selection priorities must be concise, totaling no more than 500 words. We are looking for key factors supporting your application, with brief substantiation (eg. school data, web address to evidence, clear statement of fact).
